

NKF UPDATE FLUORIDE POSITION STATEMENT

10 June 2008

The United States National Kidney Foundation have updated their 1981 Water Fluoridation Position Statement and have now concluded that “specific recommendations regarding fluoride intake in CKD patients are not possible based on available limited data”.

This conclusion mirrors the conclusion of the Kidney Health Australia 2007 Position Statement on “The Risks of Consumption of Fluoridated Water for People with Chronic Kidney Disease”.

The revised Fluoride Position Statement from the National Kidney Foundation can be viewed at http://www.kidney.org/atoz/pdf/Fluoride_Intake_in_CKD.pdf and more information on the Kidney Health Australia Fluoride Position Statement can be found [here](#).
