

Management of Stage 3 Chronic Kidney Disease

Kidney Health Australia in partnership with East Wimmera Health Service presents an interactive case-study based workshop for GPs and nurses about CKD.

Participants can expect to achieve the following learning outcomes

- Be able to detect Chronic Kidney Disease (CKD) through the accurate interpretation of kidney function
- Be able to outline best practice management of CKD, particularly stage 3
- Display increased confidence in the ability to manage Stage 3 CKD
- Have improved knowledge of when to refer patient with CKD to a Nephrologist
- Develop confidence implementing a practice-based system to identify patients at a higher risk of CKD for a kidney health check

Date:	Thursday 26th May 2011
Presented By:	A/Prof John Richmond Consultant Physician and Nephrologist Ballarat Health Services
Time:	6.30pm Registration & Dinner 7 – 9pm Workshop
